■ GREENAIR ENVIRONMENTAL INTELLIGENCE

Comprehensive Unit Test Assessment

Document ID: 26706971-a591-46f3-a12d-83910c314fe0 | Generated: October 24, 2026 - 10:18 UTC

1. Executive Summary & Findings

• Automated environmental parameters review conducted with standard safety baselines.

Regulatory Notice & Limitations

This report is generated autonomously by the GreenAir AI Agent for analytical, educational, and decision-support purposes. Model classifications reflect patterns learned by a supervised machine-learning model from training data and do not substitute for official regulatory Air Quality Index (AQI) determinations published by government environmental authorities. Statistical anomalies indicate mathematical outliers in sample distributions and should not be interpreted as confirmed sensor failures or emergency incidents without ground-truth physical verification. This document does not provide personalized medical diagnoses.
